

Are you 100% 'intune' with your data?

Find out why it's important not to miss a single beat!

What is 'intune'?

intune is your solution to remote database and server administration, maintenance and support—ensuring that data loss is virtually eliminated. We remotely monitor your systems to make sure everything is operating 'intune.' We also have the ability to proactively recognize an incident before it occurs. This has been one of the most valuable components of the intune package. Monthly **intune** reports give you precise and concise information about the status and stability of your monitored systems.

In short—we maintain the health and stability of your systems so you can maintain the health and stability of your business.

Orchestrated Approach

Think about how a musical ensemble works together before they perform—in order for them to play in tune together they each need to carefully listen to the other musicians in the ensemble and adjust their instruments to accommodate the whole group. This type of precision is similar to how a database should be managed—to keep it **intune** with the data it stores and the people who use it.

Our expert staff knows how to “listen” carefully to your systems and keep them **intune and performing at optimal levels for your business!**

Contact us to learn more about how we can take care of your data while you take care of business.

How does intune work?

We provide superior remote system and database administrators (24x7) who become virtual members of your IT organization. We use secure, high-speed network connections to take responsibility of all aspects of managing, operating, maintaining and supporting your systems on a daily basis.

The **intune** package is contracted on an annual basis for covered systems. Included in the package are the following:

- ✓ Initial system evaluation and tune-up.
- ✓ Continual monitoring & proactive alerts
- ✓ Monthly reporting
- ✓ System maintenance and routine administration (as needed)
- ✓ Back-ups
- ✓ Annual review & planning

What benefits will I see from intune?

Peace of mind is the number one benefit of the **intune** package! We accomplish this by providing a unique blend of the following benefits:

- Scalability
- Flexibility / Adaptability
- Expertise in our Staff
- Reliability in our People and our Processes
